student Student Nasis ID

Students 18 Years of Age or Older – This query returns all students who are 18 years of age or older on the current date.

Students without Guardians – This query returns students who do not have a guardian relationship assigned.

Students with Multiple Guardians – This query returns students who have two or more guardian relationships assigned.

Students without a Current Household – This query returns students who do not have a current household indicated

Students in a Household by Themselves – This query returns students who are in a household with no other members.

Students in a Household of Five or More – This query returns students who are in a household that has five or more members.

Students in a Household without an Address – This query returns students who have no address assigned to their household(s).

Students Marked as “No Shows” – This query returns students who have been flagged as “no-show”

students (those who have enrollments records by have never actually attended school). The user will need the calendar ID of the desired school calendar (to replace the XX in the query with your calendar ID).

People with Staff Number but No District Assignment – This query returns staff member who are not linked to a district assignment.

Staff Member with Disabled User Accounts – This query returns staff members who have disabled user accounts.

Staff Members with User Accounts Set to “All Tools” – This query returns staff members who have All Tools checked in their User Account settings

Students in a Household without a Mail Address Incl Sec – This query returns students in one or more households that lack a mailing address including secondary addresses. This is not an exclusive query – if a student has three addresses where one is marked as mailing and the other two are not, the two non-mailing addresses would still be returned by the query.

Students in a Household without a Mail Address Excl Sec – This query returns students in one or more households that lack a mailing address excluding secondary addresses. This is not an exclusive query – if a student has three addresses where one is marked as mailing and the other two are not, the two non-mailing addresses would still be returned by the query.

Students with more than 1 Primary Mail Address – This query returns students that have more than one primary mailing address listed.

CURRICULUM: Queries for student academic/curriculum information

Students Taking a Course – This query returns students who are taking a course, as specified. Use Box B to indicate a specific course or a general type of course. This example will return all students taking any type of course containing the word “literature.”

Students Who Did Not Get a Requested Course – This query returns students who did not get scheduled into the specified course they requested. The course number must be specified.

Students with Fewer Credits than Desired for Grade – This query returns students enrolled in certain grade who have less than a specified amount of credits. This example will return all twelfth-graders who have fewer than 20 credits.

Students on the “A” Honor Roll – This query returns students who are considered “A” honor-roll students. This query may require user modifications to fit specific needs such as the name of the Grading Task, score name and the Calendar ID.

Students on the “A/B” Honor Roll – This query returns students who are considered “A” or “B” honor-roll students. This query may require user modifications to fit specific needs such as the name of the Grading Task, score name and the Calendar ID.

Students on “A/B” Honor Roll Exl “A” – This query returns students who are considered “A” or “B” honor-roll students, but excludes those who received only A’s. This query may require user modifications to fit specific needs such as the name of the Grading Task, score name and the Calendar ID.

BEHAVIOR: Queries for students with Behavior information

Students without Behavior Events – This query returns students who do not have behavior event records.

Student Events where Role <> Offender, Participant – This query returns students who do not have behavior events. It also returns students who have events in which he/she is not marked as an “offender” or as a “participant.”

Students without Behavior Resolutions – This query returns students who do not have behavior resolutions.

Students with No Events Between Date Range – This query returns students who have behavior events, but do not have any events occurring between the specified date and time range. The date range that you are querying will need to be modified in the ad hoc query. Ad Hoc Reporting>Filter Designer> Select this report: **Students with No Events Between Date Range**>Edit. Modify the date ranges in the Select Statement box and hit save.

Students with No Resolutions Between Date Range – This query returns students who have resolutions, but do not have any resolutions occurring between the specified date and time range. The date range that you are querying will need to be modified in the ad hoc query. Ad Hoc Reporting>Filter Designer> Select this report: **Students with No Resolutions Between Date Range**>Edit. Modify the date ranges in the Select Statement box and hit save.
